Completed Water, Non-Drinking Water and/or Sewer Design Checklist
(available in the Westernport Water supplementary design standard documents)

2. Consultant's Assurance

As the Consultant's Senior Management Representative responsible for the design of the abovementioned Works,

I verify that the design:

- Has been audited by an Accredited Consultant before submission;
- For sewerage, is in accordance with WSA 02-2014-3.1 Sewerage Code of Australia Melbourne Retail Water Agencies Edition Version 2.0 and Westernport Water's supplementary sewerage design standard;
- For water and/or recycled water (where applicable), is in accordance with WSA 03-2011-3.1 Water Supply Code of Australia Melbourne Retail Water Agencies Edition Version 2.0 and Westernport Water's supplementary water design standard;
- For sewerage pumping station, is in accordance with WSA-04-2005-2.1 Sewerage Pumping Station Code of Australia and Westernport Water's supplementary water design standard;
- Is in accordance with all the relevant Australian Standards;
- Has been approved/verified by the CFA (water only), the municipal council, affected landowners and other relevant authorities;
- Meets all environmental requirements;
- Locates all services within registered easements or road reserves;
- Is in accordance with the Westernport Water's Class A Recycled Water Developer Guidelines (if applicable).
