

Annual Water Outlook 2020

Water availability from 1 Dec 2020 to 30 Nov 2021

At a glance

Water supply is sufficient to meet demand for the year ahead

Water restrictions are not expected for the year ahead

Ongoing Permanent Water Saving Rules apply

Average temperatures during December to February are likely to be above the long-term average

Wetter than avg. 70% chance of exceeding above avg. rainfall this summer

(due to La Niña) for eastern Australia

Our customers

- 21,567 customers
- 50% of customers are non-permanent residents

Our service area

27 townships including:

- Corinella/Coronet Bay
- Dalyston/Archies Creek
- Grantville/Pioneer Bay
- Kilcunda
- Phillip Island
- San Remo

Water use 2019-20

Total water consumption 2,138 ML:

- 66% residential use
- 40% non residential
- 4% other

Water resource position

Water supply sources

- Tennent Creek and Bass River
- Groundwater from Corinella Aquifer
- Melbourne supply system

Tennent Creek

Tennent Creek is Candowie Reservoir's primary water source and can supply 2,911 ML/yr annually. In 2019-20 1,739 ML was taken.

Water storage forecast

- Candowie Reservoir storage levels are expected to remain within the normal operating mode for the next year, with no restrictions forecasted
- Historical water trends are available on our website

Recycled water

237 ML of recycled water was used by Westernport Water and the community in 2019-20.

- 38% community use
- 62% irrigation on Westernport Water land

Summer outlook 2020-21

The BOM advises that wetter than average conditions are likely with 70% chance of exceeding above average rainfall (due to La Niña)

Average daytime temperatures during December to February are likely to be above the long-term average

Average night-time temperatures during December to February are very likely to be above the long-term average across almost all of Australia.

Urban water strategy actions

- Ongoing monitoring and assessment of system operating rules
- Actively pursue water conservation measures, including leakage detection, education and community awareness, as well as implementing water efficiency programs
- Continue to seek new customers for Class A recycled water supply, relieving pressure on the drinking water supply and reducing ocean outfall
- Continue to monitor and review supply and demand forecasts in line with our Drought Preparedness Plan
- Develop operating protocol for priority selection of water supply in light of successful commission of Melbourne Pool connection
- Begin modeling, taking into account customer and stakeholder engagement for the next iteration of the Urban Water Strategy.
