SEWER CONNECTION

- Connection fees will vary depending upon the occupancy type, number of fixtures and work type.
- I will ensure the works are carried out in accordance with Westernport Water's By-Laws and WSSA Guidelines.
- I will ensure that an accurate "As Constructed" Drainage Plan is lodged with Westernport Water immediately following the drain installation alteration.

WATER AND RECYCLED WATER CONNECTIONS

***Note: Where Class A Recycled Water is connected (Dual pipe system), Westernport Water will undertake three mandatory inspections at the following stages:**

- **R1 Inspection** - Main to Meter inspection of separation below ground pipework prior to backfill, Recycled Water Meter Stop will be turned off and locked at this stage
- **R2 Inspection** - Rough in stage inspection of internal pipework prior to plaster
- **R3 Inspection** - Final inspection prior to key handover to property owner, Recycled Water meter stop lock will be removed if R3 inspection passes

***It is the plumbers responsibility to contact Westernport Water on 1300 720 711 to arrange for these inspections. Please refer to our website for current fee.**

- Separate meters are to be used for the dual pipe system and installed within two working days of pick-up from depot.
- Any tapping excavation deeper than 1.5 metres **MUST** be timber shored or benched
- Bridging pipes are not acceptable and constitute water theft
- Pipes and fittings must meet Australian standards
- Recycled water meter assemblies and above ground pipes must be solid purple in colour

*Westernport Water requires that when an application is made to connect to our water services, the applicant must also connect to the recycled water when the property is located within our Class A Recycled Water Network.

In lodging this application, the plumber declares that they are authorised by the owner or occupier to make this application on their behalf and agree to the Conditions of Connection.

I HAVE READ AND ACCEPT THE ABOVE CONDITIONS
