

PUBLIC NOTICE AIR SCOURING

Water mains cleaning

As part of our commitment to maintain high quality drinking water, Westernport Water will be undertaking water mains cleaning in parts of Phillip Island and Bass from 21 April to 30 April 2026.

Air scouring is a proven method of cleaning water mains and involves injecting filtered pressurised air through the pipe.

Air scouring will take place in the following locations: **Cowes (West), Wimbledon Heights, Smiths Beach and Bass.**

- Affected customers will be directly notified in writing.
- Impacted customers may be without water for a few hours.
- A full schedule is available on our website.
- If your water appears milky or cloudy following the works, this is caused by small pressurised air bubbles. This will resolve over time as the water settles and is safe to drink.
- Contractor H&S Maintenance, who are cleaning the water mains, do not necessarily have to be in your street or at your property to carry out their work.

Please contact our Project Coordinator on 1300 720 711 if you have any questions
